

## The product

# Collano® DS 7003

## The adhesive that doesn't burn

**When extreme temperature resistance is required, Collano DS 7003 is the adhesive of choice. It resists temperatures in excess of 1000 °C and adheres firmly to a broad variety of materials.**

### Safety

- High temperature resistance up to min. 1000 °C
- Non-flammable adhesive
- Good adhesion to mineral substrates (rock, concrete, cement panels, plaster panels, etc.)
- Good adhesion to untreated metals

### User-friendly

- Immediate applicability even after months of storage
- Immediate processing, no preparation of the adhesive required
- Available in various viscosities
- Easy cleaning of work tools with water
- Simple application with rolling or spraying processes, paint roller or brush

### Environment-friendly

- In case of fire, the adhesive does not emit harmful gases
- Trouble-free disposal of composite materials
- Free of solvents and isocyanates

### Broad range of applications

- Applications in the transport industry and in public buildings
- Shipbuilding
- Fabrication of multi-layered insulation panels (glass wool, rock wool, metals)
- Bonding of insulation panels to mineral substrates
- Bonding of aluminum foils to porous substrates (wood, particleboard panels, etc.)
- Bonding of plaster and plaster-fiber panels to metal surfaces (galvanized sheet metal)
