

The product

Collano® UV N1 Series Solvent-free, safe and ecologically friendly

Collano UV N1 series UV-curable pressure-sensitive hot melt adhesives replace solvent-based systems in the domain of adhesives for wet wipe pouch seals. Collano UV N1 series adhesives feature a broad adhesion spectrum with high initial tack on a wide variety of substrates. Other quality characteristics are soft, noiseless opening and reliable resealing.

Cost-effective and convenient

- Environmentally friendly alternative to solvent-based systems
- The one solution for oily and alcoholic wet wipe pouches

Wide adhesion spectrum

- High initial tack on a wide range of pouch materials for reliable sealing
- Soft, noiseless opening and good resealing
- Excellent resistance to wet wipe substances allows residue-free opening

Fields of application

- Labels for resealable packaging (tissues)
- Peel and reseal labels for wet wipe pouches
- Removable applications on smooth surfaces

Products

- Collano UV N1 180
- Collano UV N1 288
- Collano UV N1 513
- Collano UV N1 519
